MATERIAL SAFETY DATA SHEET

1. Product and Company Identification:

Product Name: MLDCLN450/1000
Manufacturer: AUDEC CORPORATION
No.7 Shimokawa Bldg., 10-10 Higashimagome
2-Chome, Ota-ku, Tokyo, Japan 143-0022
Emergency Phone: 03-5718-7425
Fax Phone: 03-5718-7426

2. Composition/Information on Ingredients (See Section 8 for exposure guidelines)

</table>

3. Hazardous Identification

[Classification] Flammable Liquid

[Dangerousness] Fire & Explosion Inducement;
The Iso-Hexane being used as raw material is flammable liquid.

[Toxicity] The vapor irritates the eyes, nose or throat and anesthetic effect. Acute poisoning may result if large amounts of the highly concentrated vapor is inhaled in a short time.
4. First Aid Measures

**Eyes:** Flush eyes, including under the eyelids, with large amount of water. If irritation persist, seek medical Attention.

**Skin:** Wash thoroughly with mild soap and water.

**Ingestion:** Give copious amount of water or preferably milk and seek medical attention.

**Inhalation:** Remove to fresh air. Seek medical attention if symptoms persist.

5. Fire Fighting Measures

Cut off combustion source to the fire and extinguish it using a fire extinguishing agent. Also, cool down nearby tanks, building, etc., using a water spray to prevent the fire form spreading.

Extinguishing the fire form windward and wear a respirator as necessary.

6. Accidental Release Measures

In case of small amount of leakage, collect it in an empty container by absorbing with earth or sand and wash off the remains with a large amount of water. In case of large amount of leakage, prevent it from flowing with earth or sand, and lead it to a safe place, cover the surface with form, etc. and, if possible, collect it in a container. Wash off the remains with large amounts of water. In this case, make sure that it should not be drained to a river, etc.

7. Handling and Storage

Handling: Wear protective gear to avoid inhalation and prevent it from coming in contact with eyes, skin or clothing. Work from windward if possible. Keep it away from high temperature substances, spark or flame. Prevent if from coming in contact with strong acid chemicals. Take measures against static electricity and wear conductive work clothing and shoes. Use up all before disposing of it. Keep children away from the work site.

Storage: Avoid direct sunlight and store it where temperature does not rise over 40°C. Do not allow oxidizing or organic hyperacid substances nearby.

Transportation: Use a container which can prevent temperature from rising over 40°C.

8. Exposure Control/Personal Protection

Respiratory Protection: Organic Vapor type
Ventilation: Local exhaust, Mechanical type.
Protective Glove: Rubber or Plastic recommended.
Eye Protection: Chemical workers goggles.
Wear: Long sleeve clothing.
9. Physical and Chemical Properties

Physical State: liquid  pH: N/A
Vapor Pressure: 44.1 kPa at 38°C  Melting point: N/A
Vapor density: 2.99  Freezing Point: -1.1°C
Solubility in Water: Not applicable  Specific Gravity: 0.66
Evaporation Rate: Not determined  Melting point: N/A

10. Stability and Reactivity

Stability: This product is stable under all normal conditions of storage. Hazardous polymerization will not occur.
Incompatibility: Oxidizing material can cause a reaction.

Hazardous Decomposition Products: None

11. Disposal Considerations

Consult local, state and federal regulations for compliance.

12. Other Information

All reasonable care has been taken in the preparation of the information contained herein, the manufacturer extends no warranties, makes no representation and assumes no responsibility as to the accuracy or suitability of such information for application to purchaser's intended purposes or for consequences of its use.
