4 FIRST AID MEASURES

Inhalation: If inhaled, move person into fresh air. Monitor respiratory function. If breathing is difficult, provide oxygen. If not breathing, give artificial respiration. If symptoms persist, obtain medical attention.

Skin Contact: Promptly flush skin with water for at least 15 minutes to ensure all chemical is removed. Remove contaminated clothing and wash before reuse. Consult a physician if irritation persists.

Eye Contact: Flush with large amounts of water for at least 15 minutes, lifting upper and lower lids occasionally. Remove contact lenses is present and easy to do so. Get immediate medical attention. Continue rinsing eyes during transport to hospital.

Ingestion: Rinse mouth with water. Do NOT induce vomiting unless instructed to do so. Material can enter lungs (aspiration hazard) during swallowing or vomiting resulting in lung inflammation or other lung injury. Never give anything by mouth to an unconscious person. Get immediate medical attention.

5 FIRE FIGHTING MEASURES

Flash Point: > 60 °C (140 °F)
Flash Point Method: (TCC)
Burning Rate: No data available
**Carbon Killer**

Autoignition Temp: No data available
LEL: No data available
UEL: No data available

Water Spray
Water Fog
Carbon Dioxide
Alcohol-Resistant Foam Dry Chemical

Special Hazards Arising From the Substance or Mixture:
Carbon Oxides Hydrocarbon particulate Nitrogen Oxides (NOx) Sulfur Oxides

Advice for Firefighters:
Firefighters should wear full-face, positive-pressure respirators.

Further Information:
If incinerated, may release toxic fumes.
Use water spray to cool unopened containers.
Do NOT use high volume water jet to extinguish fire, as the force of the water jet may cause fire to spread. Beware of vapors accumulating to form explosive concentrations.
Vapors can accumulate in low areas.
See Section 7 for more information on safe handling.
See Section 8 for more information on personal protection equipment. See Section 13 for disposal information.

### 6 ACCIDENTAL RELEASE MEASURES

**Personal Precautions, Protective Equipment and Emergency Procedures:**
Use personal protective
Equipment. Keep from contacting
skin or eyes. Avoid breathing
vapors, mist or gas. Ensure
adequate ventilation.
Evacuate personnel to safe areas.
Remove all sources of ignition.
If any equipment is necessary, ensure that it is non-sparking and electrically-protected.

**Environmental Precautions:**
Prevent further release (leakage/spillage) if safe to do
so. Do not allow product to enter drains.
Do not allow to drain to environment.

**Methods and Materials for Containments and Cleaning Up:**
Ensure adequate ventilation.
Contain spillage and absorb with liquid-binding material (sand, diatomite, universal binders, vermiculite) and placed in container for disposal.
Spill may also be diluted with equal volume of water and absorbed (as above) or collect with an electrically-protected vacuum cleaner or by wet-brushing. Collected waste should then be placed in container for disposal.
Dispose of contaminated material according to Section 13.

**Reference to Other Sections:**
See Section 7 for information on safe handling.
See Section 8 for information on personal protection equipment. See Section 13 for information on proper disposal.
# 7 HANDLING AND STORAGE

**Handling Precautions:**
- Avoid breathing vapors or mist.
- Avoid contact with eyes, skin, or clothing. Keep containers closed when not in use.
- Do not expose containers to open flame, excessive heat, or direct sunlight. Keep away from sources of ignition.
- Do not smoke while using material.
- Take measures to prevent the buildup of electrostatic charge. Do not puncture or drop containers.
- Handle with care and avoid spillage on the floor (slippage). Keep material out of reach of children.
- Keep material away from incompatible materials. Wash thoroughly after handling.

**Storage Requirements:**
- Keep container tightly closed.
- Avoid inhalation of vapors or mist upon opening container. Store in a well-ventilated place.
- Do not store at elevated temperatures. Do not store in direct sunlight.
- Store away from strong acids, strong bases, strong oxidizing agents and strong reducing agents.

# 8 EXPOSURE CONTROLS/PERSONAL PROTECTION

**Engineering Controls:** All ventilation should be designed in accordance with OSHA standard (29 CFR 1910.94). Use local exhaust at filling zones and where leakage and dust formation is probable. Use mechanical (general) ventilation for storage areas. Use appropriate ventilation as required to keep Exposure Limits in Air below TLV & PEL limits.

**Personal Protective Equipment:**

- **Eye/face protection:** When using material use safety goggles, gloves and apron according to HMIS PP, C. A vapor respirator according to HMIS PP, U is also strongly recommended if working with material in poorly ventilated spaces. All safety equipment should be tested and approved under appropriate government standards such as NIOSH (US) or EN 166 (EU).

- **Skin protection:** Handle with gloves made from PVC, neoprene, nitrile, butyl-rubber or fluorinated-rubber. Gloves must be inspected prior to use. Use proper glove removal technique (without touching glove’s outer surface) to avoid skin contact. Dispose of contaminated gloves according to applicable laws and laboratory practices.

- **Body Protection:** Chemically resistant gloves, apron and safety goggles are recommended. Type of protective equipment should be selected based on concentration amount and conditions of use of this material.

- **Respiratory protection:** Full-face vapor respirator may be required as backup to engineering controls when proper engineering controls are not in place to keep TLV and PEL limits below defined thresholds.

**Control of environmental exposure:**
Prevent leakage or spillage if safe to do so. Do not let material enter drains.
